Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 231

AB_2-type
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
AB_5-type alloy
Fermi energy effects on absorption of hydrogen in $LaNi_5$ and $LaCo_5$ alloys 454
A.c. impedance
hydrogen permeation through PECVD (plasma-enhanced chemical vapor deposition) TiO_2 film on Pd by the time lag method 315
Activation
effects of oxidation and hydroxidation on the H_2 reactivities with Ni, Co, Ni–Co and $LaNi_{2.5}Co_{2.5}$ 684
Activation energy
high temperature hydrogen diffusion in $Zr_{0.33}Ni_{0.67}$–H_X amorphous alloys 334
kinetics of hydrogen evolution reaction at nonstoichiometric hydrogen storage alloys for nickel-hydrogen batteries 558
Activity
the electrochemical charge–discharge properties of Zr–Cr–Ni hydrogen storage alloys 573
Aging
thermodynamic characterization of new palladium alloy tritides 773
aging effects in La–Ni–Mn tritides 792
Alkali metal hydride
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Alkaline electrolytes
surface and bulk properties of the $Ti_yZr_{1-y}(V_xNi_{1-x})_2$ alloy system as active electrode material in alkaline electrolyte 645
Amorphization
hydrogen diffusion in $DyFe_2$ and its effect on magnetic properties 71
Amorphous
hydrogen-induced amorphization of intermetallics 20
hydrogen-induced amorphization of titanium-based intermetallic compounds with the $D0_{19}$ structure 29
Amorphous alloy
high temperature hydrogen diffusion in $Zr_{0.33}Ni_{0.67}$–H_X amorphous alloys 334
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Amorphous alloys
muon spin relaxation in hydrogen loaded amorphous alloys 262
electrochemical pressure–composition isotherms for amorphous $Ni_{1-x}Zr_x$ alloys 321
Amorphous Mg–Ni alloys
the relation between the discharge capacity and cycling number of mechanically alloyed Mg_xNi_{100-x} amorphous electrode alloys 621
Anelastic relaxation
hopping and tunnelling of D trapped by substitutional Zr in Nb single crystals 274
Anelastic relaxations
stress-induced reorientation of oxygen–hydrogen pairs in a $Ta_{75}Nb_{25}$ alloy 279
Annealing
the annealing effect on the durabilities of La-substituted $CaNi_5$-type alloys 835
Atomic radius
substitution effect of elements in Zr-based alloys with Laves phase for nickel–hydride battery 587
Auger spectroscopy
the hydriding and dehydriding kinetics of FeTi and $Fe_{0.9}TiMn_{0.1}$ 670
the effect of particle size and surface composition on the reaction rates of some hydrogen storage alloys 841

Ball mill
hydriding characteristics of Mg-based composites prepared using a ball mill 810
Ball milling
effect of ball milling on hydrogen absorption properties of FeTi, Mg_2Ni and $LaNi_5$ 804
Band structure
the electronic structure of the hydrogen solid solution in Ti_3P 153
Fermi energy effects on absorption of hydrogen in $LaNi_5$ and $LaCo_5$ alloys 454
Battery
electrochemical and surface properties of iron-containing AB_5-type alloys 639
B.C.C. solid solution
hydrogen absorption properties of Ti–Cr–A (A ≡ V, Mo or other transition metal) B.C.C. solid solution alloys 528
Binary Ti–Cr alloys
hydrogen absorption properties of Ti–Cr–A (A ≡ V, Mo or other transition metal) B.C.C. solid solution alloys 528
Bulk susceptibility
susceptibility and proton line shift of $Zr_{0.33}Ni_{0.67}$–H_X alloys 330

C15 Laves phase structure
hydriding behavior of pseudobinary $CaAl_{2-x}M_x$ ($M = B$, Si, $0 \leq x \leq 1$) alloys 675
Ca-based alloy
a new family of hydride electrode materials based on $CaNi_5$-type alloys 751
Ca-based alloys
the annealing effect on the durabilities of La-substituted $CaNi_5$-type alloys 835
Calcium alloy
surface properties of the fluorinated calcium-based AB_5 alloys 376

Calorimetry
thermodynamic and degradation studies of $LaNi_{4.8}Sn_{0.2}$–H using isotherms and calorimetry 473
CANDU
hydrogen solubility limits in Excel, an experimental zirconium-based alloy 488
Capacity degradation
effects of hydriding–dehydriding cycling on *P–C–T* and electrochemical properties of La–Ca–Ni–Al alloys 594
the effects of mechanical grinding on the hydrogen storage properties of $MlNi_{4.7}Al_{0.3}$ alloy 820
Catalytic site
surface and metallographic microstructure of the La-added AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 392
Cerium hydride
low temperature states in the β-CeH_{2+x} phase 115
the incipient kinetics of hydride growth on cerium surfaces 368
Ch_4
hydrogen purification with metal hydride sintered pellets using pressure swing adsorption method 865
Chemical bonding
the electronic structure of the hydrogen solid solution in Ti_3P 153
Chemical equilibrium
chemical equilibrium of the ferromagnetic $LaCo_5$–H system in strong magnetic fields 205
Chemical heat pump
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Classical isotope effect
quantum aspects of hydrogen motion in niobium at high temperatures 214
Cluster ions
SIMS investigations on the system $NbH_n(D_n)$ $(0<n<1)$ 347
Coating effect
ion-driven permeation of hydrogen through surface-coated iron 291
Cobalt
thermodynamic characterization of new palladium alloy tritides 773
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824
Composite
hydriding characteristics of Mg-based composites prepared using a ball mill 810
Composite materials
formation mechanism of MgH_2 at low temperatures in $Ti_{0.6}Zr_{0.4}Mn_{0.8}CrCu_{0.2}$–(Mg + Mg_2Cu) 689
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Compounds
hydrogen solubility in $PdLi_{0.94}$ and $Pd_2Li_{1.04}$ compounds 533
Cryogenics
metal hydride compressor and its application in cryogenic technology 907
Crystal field interactions
measurement of the perturbation of the crystal electric field at Pr^{3+} in $PrNi_5$ next to a single hydrogen like interstitial 164
Crystalline films
hydrogen diffusion studies of microcrystalline and crystalline $LaNi_{3.94}Si_{0.54}$ films 297
Crystalline quality
influence of the preparation conditions of titanium hydride and deuteride $TiH_X(D_X)$ $(X \approx 2.00)$ on the specific heat around the δ–ε transition 78
Crystallization
hydrogen-induced amorphization of intermetallics 20
hydrogen-induced amorphization of titanium-based intermetallic compounds with the $D0_{19}$ structure 29
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Crystal structure
crystal structure of γ-phase $RCo_3H_{\sim 4}$ hydrides 104
Cycle life
a mathematical model for the cycle life of hydride electrodes 611
the $TiV_3Ni_{0.56}$ hydride electrode: its electrochemical and cycle life characterization 616
Cycle lifetime
improvement in cycle life performance of high capacity nickel–metal hydride battery 598
Cycling properties
hydrogen absorption properties of Ti–Cr–A (A ≡ V, Mo or other transition metal) B.C.C. solid solution alloys 528

Deep donor levels
hydrogen permeation through PECVD (plasma-enhanced chemical vapor deposition) TiO_2 film on Pd by the time lag method 315
Defect structure
high-pressure studies of high-concentration phases of the Ti–H system 46
Degradation
thermodynamic properties and the degradation of $ZrNiH_x$ at elevated temperatures 518
Degradation of $LaNi_{4.8}Sn_{0.2}$–H
thermodynamic and degradation studies of $LaNi_{4.8}Sn_{0.2}$–H using isotherms and calorimetry 473
Density of states
electronic structure of perovskite-derived hydrides 147
Deuterides
neutron diffraction study of YMn_2D_x deuterides $(1 \leq x \leq 3.4)$ 99
structural and thermodynamic properties of the deuterium–palladium solid solutions systems: D_2-[Pd(Pt), Pd(Rh), Pd(Pt, Rh)] 440
Deuterium ordering
neutron powder diffraction study of deuterium ordering in β phase Pd–D at low temperatures 108
D(^{3}He, p)^{4}He nuclear reaction
an ion channeling study of V_2D crystals 132
Diffuse scattering
neutron scattering study of deuterium short-range order in VD_x 121
neutron diffraction study on the short-range order in a $VD_{0.81}$ single crystal 126
Diffusion
hydrogen-induced structural changes of Fe_2Ce alloys 66
hydrogen diffusion in $DyFe_2$ and its effect on magnetic properties 71

muon spin relaxation and hydrogen diffusion in the HfV_2 Laves phase 255
muon spin relaxation in hydrogen loaded amorphous alloys 262
hydrogen diffusion in nanocrystalline, mesoscopic, and microcrystalline heterogeneous alloys 267
the science and application of modulated permeation experiments 302
Diffusion of impurities
low-temperature quantum diffusion of light particles in solids 208
Diffusion path
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Discharge capacity
a mathematical model for the cycle life of hydride electrodes 611
the $TiV_3Ni_{0.56}$ hydride electrode: its electrochemical and cycle life characterization 616
a new family of hydride electrode materials based on $CaNi_5$-type alloys 751
the effects of mechanical grinding on the hydrogen storage properties of $MlNi_{4.7}Al_{0.3}$ alloy 820
Dislocation relaxation
hydrogen-induced internal friction in nanocrystalline palladium 337
Disordered
NMR spectral density functions for disordered metal–hydrogen systems 238
Disproportionation
microstructural evolutions during HDDR phenomena in $Sm_2Fe_{17}N_x$ compounds 60
effects of hydriding–dehydriding cycling on *P–C–T* and electrochemical properties of La–Ca–Ni–Al alloys 594
Durability
a new family of hydride electrode materials based on $CaNi_5$-type alloys 751
the annealing effect on the durabilities of La-substituted $CaNi_5$-type alloys 835

Effective hydrogen storage
characteristics of a hydrogen-absorbing alloy developed for a portable fuel cell 898
Effect of surface contamination
effect of surface contamination on the hydriding behaviors of $LaNi_{4.5}Al_{0.5}$, $LaNi_{2.5}Co_{2.5}$ and $LaNi_{4.5}Mn_{0.5}$ 403
Electrical transport properties
electrical transport properties of $ZrFe_{2-x}Cr_xH_y$ 176
Electrocatalytic activity
characteristics of the superstoichiometric C15-type Laves phase alloys and their hydride electrodes 582
Electrochemical activation
surface properties of the F-treated ZrTiVNi alloy 387
Electrochemical behaviour
structural studies of a new Laves phase alloy $(Hf,Ti)(Ni,V)_2$ and its very stable hydride 90
Electrochemical catalysis
the formation of excited H species using metal hydrides 856
Electrochemical characteristics
effects of zirconium on the surface structures of the fluorinated hydrogen-absorbing alloys 417
Electrochemical impedance measurements
electrochemical impedance spectra study of the hydrogen storage electrode 625
Electrochemical measurement
proton conductors of oxide and their application to research into metal–hydrogen systems 706
Electrochemical properties
effect of Pr content in Ml on the electrochemical properties of $Ml(Ni–Co–Mn–Al)_5$ alloys 550
effect of rare earth composition on the electrochemical properties of multicomponent $RENi_{5-x}M_x$ (M = Co, Mn, Ti) alloys 553
the electrochemical properties of hydrogen storage Zr-based Laves phase alloys 578
electrochemical and surface properties of iron-containing AB_5-type alloys 639
Electrochemical property
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
Electrochemical reactions
effect of KOH pretreatment on the hydriding properties of $LaNi_{2.5}Co_{2.5}$ alloy 679
Electrode
the electrode characteristics and modified surface properties of $V_{0.9}Ti_{0.1}$ alloy sintered with Ni powder 650
Electrode material
intrinsic behaviour analysis of substituted $LaNi_5$-type electrodes by means of in-situ neutron diffraction 537
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
a new family of hydride electrode materials based on $CaNi_5$-type alloys 751
Electrode performances
the electrochemical charge–discharge properties of Zr–Cr–Ni hydrogen storage alloys 573
Electrode potential
influences of magnetic fields on the electrochemical potential of $GdCo_5H_x$ electrodes 631
Electrodes
electrochemical and surface properties of iron-containing AB_5-type alloys 639
effects of nickel coating on the properties of metal hydride electrodes 846
Electrolytic loading
kinetics of H(D)–absorption in Pd cathodes 655
Electronegativity
substitution effect of elements in Zr-based alloys with Laves phase for nickel–hydride battery 587
Electronic structure
electronic structure of perovskite-derived hydrides 147
electronic structure of metal hydrides studied by high field magnetization 159
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Electron–phonon coupling
electronic structure of perovskite-derived hydrides 147
Electron state
photo-electrochemical properties of hydrogen in anodically oxidized niobium 702
Element substitution
a new family of hydride electrode materials based on $CaNi_5$-type alloys 751

Energy storage
hydrogen absorption properties of uranium alloys 780
Equilibria
equilibria in the hydrogen–intermetallics systems with high dissociation pressure 498
Equilibrium potential
electrochemical pressure–composition isotherms for amorphous $Ni_{1-x}Zr_x$ alloys 321
Eutectic microstructure
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Excel
hydrogen solubility limits in Excel, an experimental zirconium-based alloy 488
Excel alloy
the behaviour of hydrogen in Excel alloy 785
Exchange interaction
magnetic properties of the hydrides based on R–Fe compounds 201

Fe_2P-type structure
hexagonal ZrNiAl alloy and its hydride (deuteride) with the Fe_2P-type structure 755
Fermi energy
Fermi energy effects on absorption of hydrogen in $LaNi_5$ and $LaCo_5$ alloys 454
FeTi
the hydriding and dehydriding kinetics of FeTi and $Fe_{0.9}TiMn_{0.1}$ 670
hydrogen purification with metal hydride sintered pellets using pressure swing adsorption method 865
Fluorinated hydriding alloys
properties and characteristics of fluorinated hydriding alloys 742
Fluorinated surface
properties and characteristics of fluorinated hydriding alloys 742
Fluorinated surface structure
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
Fluorination
surface properties of the fluorinated calcium-based AB_5 alloys 376
surface characteristics of fluorinated hydriding alloys 380
a study of the surface composition and structure of fluorinated Mg-based alloys 397
effects of carbon monoxide on the hydriding reactions of the untreated and fluorinated $LaNi_{4.7}Al_{0.3}$ alloys 829
hydrogen purification using fluorinated $LaNi_{4.7}Al_{0.3}$ alloy 860
Fluorine solution
properties and characteristics of fluorinated hydriding alloys 742
Fluorine treatment
surface and metallographic microstructure of the La-added AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 392
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 666
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Formation mechanism
formation mechanism of MgH_2 at low temperatures in $Ti_{0.6}Zr_{0.4}Mn_{0.8}CrCu_{0.2}$–(Mg + Mg_2Cu) 689
F-treatment
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
F-treatment effects
effects of zirconium on the surface structures of the fluorinated hydrogen-absorbing alloys 417
F-treatment technique
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
properties and characteristics of fluorinated hydriding alloys 742
Fuel cell
characteristics of a hydrogen-absorbing alloy developed for a portable fuel cell 898
Fundamentals
Fermi energy effects on absorption of hydrogen in $LaNi_5$ and $LaCo_5$ alloys 454

Gas cooled reactor
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Gas/solid system
thermodynamic studies of the $LaNi_{5-x}Sn_x$–H system from x = 0 to 0.5 467
$GdCo_5Hx$
influences of magnetic fields on the electrochemical potential of $GdCo_5H_x$ electrodes 631
Grain boundary
surface and metallographic microstructure of the La-added AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 392
Graphite
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Graphite intercalation compounds
interaction of potassium–graphite intercalation compounds with hydrogen at pressures up to 2000 atm 740
Gravimetric analysis
an apparatus for gravimetric analysis: its application to metal–hydrogen systems 422

Harper–Barnes fitting
proton nuclear magnetic resonance and H-site occupancy in $Zr_{0.5}Ni_{0.5-y}Cu_yH_x$ metallic glasses 325
H_2–D_2
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824
HD
some applications of hydrogenation–decomposition–desorption– recombination (HDDR) and hydrogen–decrepitation (HD) in metals processing 51
HDDR
some applications of hydrogenation–decomposition–desorption– recombination (HDDR) and hydrogen–decrepitation (HD) in metals processing 51
HDDR phenomena
microstructural evolutions during HDDR phenomena in $Sm_2Fe_{17}N_x$ compounds 60

Heat transfer
heat and mass transfer in coupled hydride reaction beds 871
Heat transformation
two-stage metal hydride heat transformer laboratory model 888
Heterogeneous alloys
hydrogen diffusion in nanocrystalline, mesoscopic, and microcrystalline heterogeneous alloys 267
High field magnetization
electronic structure of metal hydrides studied by high field magnetization 159
High pressure
thermodynamic particularities of some $CeNi_5$-based metal hydride systems with high dissociation pressure 479
interaction of potassium–graphite intercalation compounds with hydrogen at pressures up to 2000 atm 740
High-rate chargeability
kinetics of hydrogen evolution reaction at nonstoichiometric hydrogen storage alloys for nickel-hydrogen batteries 558
Homogenization
the annealing effect on the durabilities of La-substituted $CaNi_5$-type alloys 835
H/Pd measurement
kinetics of H(D)–absorption in Pd cathodes 655
H_2 reactivities
effects of oxidation and hydroxidation on the H_2 reactivities with Ni, Co, Ni–Co and $LaNi_{2.5}Co_{2.5}$ 684
Hydride electrode
the electrochemical properties of hydrogen storage Zr-based Laves phase alloys 578
effects of hydriding–dehydriding cycling on *P–C–T* and electrochemical properties of La–Ca–Ni–Al alloys 594
a mathematical model for the cycle life of hydride electrodes 611
the effects of mechanical grinding on the hydrogen storage properties of $MlNi_{4.7}Al_{0.3}$ alloy 820
Hydride electrodes
effect of rare earth composition on the electrochemical properties of multicomponent $RENi_{5-x}M_x$ (M = Co, Mn, Ti) alloys 553
the annealing effect on the durabilities of La-substituted $CaNi_5$-type alloys 835
Hydride reaction
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Hydrides
crystal structure of γ-phase $RCo_3H_{\sim 4}$ hydrides 104
neutron spectroscopic comparison of β-phase rare earth hydrides 138
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
hydrogen absorption properties of several intermetallic compounds of the Zr–Ni system 494
intrinsic behaviour analysis of substituted $LaNi_5$-type electrodes by means of in-situ neutron diffraction 537
Hydride structure
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with $M = (Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
Hydriding
consistent determination of the intrinsic kinetic properties between hydrogen and hydriding alloys 660
effect of KOH pretreatment on the hydriding properties of $LaNi_{2.5}Co_{2.5}$ alloy 679
Hydriding behaviour
hydriding behavior of pseudobinary $CaAl_{2-x}M_x$ ($M = B$, Si, $0 \leq x \leq 1$) alloys 675
Hydriding–dehydriding cycle
effects of hydriding–dehydriding cycling on *P–C–T* and electrochemical properties of La–Ca–Ni–Al alloys 594
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Hydriding kinetics
the incipient kinetics of hydride growth on cerium surfaces 368
effects of oxidation and hydroxidation on the H_2 reactivities with Ni, Co, Ni–Co and $LaNi_{2.5}Co_{2.5}$ 684
Hydriding mechanisms
the incipient kinetics of hydride growth on cerium surfaces 368
Hydriding of $LaNi_{5-x}M_x$
effect of surface contamination on the hydriding behaviors of $LaNi_{4.5}Al_{0.5}$, $LaNi_{2.5}Co_{2.5}$ and $LaNi_{4.5}Mn_{0.5}$ 403
Hydriding properties and characteristics
properties and characteristics of fluorinated hydriding alloys 742
Hydrogen
hydrogen-induced amorphization of intermetallics 20
hydrogen-induced amorphization of titanium-based intermetallic compounds with the $D0_{19}$ structure 29
agglomeration of hydrogen-induced vacancies in nickel 41
hydrogen-induced structural changes of Fe_2Ce alloys 66
hydrogen diffusion in $DyFe_2$ and its effect on magnetic properties 71
electrical transport properties of $ZrFe_{2-x}Cr_xH_y$ 176
hydrogen diffusion in nanocrystalline, mesoscopic, and microcrystalline heterogeneous alloys 267
correlations of phase relationships of metal–hydrogen systems with internal friction phenomena 287
ion-driven permeation of hydrogen through surface-coated iron 291
the science and application of modulated permeation experiments 302
hydrogen-charging of Nb/Fe multilayers 307
analysis of hydrogen in Nb/Cu multilayers using ion beams 310
proton nuclear magnetic resonance and H-site occupancy in $Zr_{0.5}Ni_{0.5-y}Cu_yH_x$ metallic glasses 325
susceptibility and proton line shift of $Zr_{0.33}Ni_{0.67}$–H_X alloys 330
influence of surface metal-hydride on the spin conversion of hydrogen molecules 364
study of hydrogen storage in Mg_2Ni by thermal desorption spectrometry 483
hydrogen solubility limits in Excel, an experimental zirconium-based alloy 488
photo-electrochemical properties of hydrogen in anodically oxidized niobium 702
proton conductors of oxide and their application to research into metal–hydrogen systems 706

hydrogen traps in the oxide–alloy interface region of Zr–Nb alloys 722
interaction of potassium–graphite intercalation compounds with hydrogen at pressures up to 2000 atm 740
hexagonal ZrNiAl alloy and its hydride (deuteride) with the Fe_2P-type structure 755
hydrogen absorption properties of uranium alloys 780
the behaviour of hydrogen in Excel alloy 785
Hydrogen-absorbing alloy
effects of zirconium on the surface structures of the fluorinated hydrogen-absorbing alloys 417
characteristics of a hydrogen-absorbing alloy developed for a portable fuel cell 898
Hydrogen-absorbing alloys
hydrogen absorption properties of Ti–Cr–A (A ≡ V, Mo or other transition metal) B.C.C. solid solution alloys 528
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824
Hydrogen absorption
some applications of hydrogenation–decomposition–desorption– recombination (HDDR) and hydrogen–decrepitation (HD) in metals processing 51
surface characteristics of fluorinated hydriding alloys 380
hydrogen absorption characteristics of Pd–Cr and Pd–Mo solid solution alloys 436
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 4: thermal history effects 460
H_2 Absorbing–desorbing characterization of the Ti–V–Fe alloy system 513
consistent determination of the intrinsic kinetic properties between hydrogen and hydriding alloys 660
the influence of tungsten substrates on hydrogen absorption by iodide titanium films 798
effect of ball milling on hydrogen absorption properties of FeTi, Mg_2Ni and $LaNi_5$ 804
hydriding characteristics of Mg-based composites prepared using a ball mill 810
effects of carbon monoxide on the hydriding reactions of the untreated and fluorinated $LaNi_{4.7}Al_{0.3}$ alloys 829
Hydrogen activation
the formation of excited H species using metal hydrides 856
Hydrogenation
influence of hydrogen on the structural and magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R=rare earth) 195
magnetic properties of the hydrides based on R–Fe compounds 201
effect of ball milling on hydrogen absorption properties of FeTi, Mg_2Ni and $LaNi_5$ 804
Hydrogen-catalyzed metal atom diffusion
a possible role for hydrogen-induced lattice migration in alloy materials processing 1
Hydrogen compressor
metal hydride compressor and its application in cryogenic technology 907
Hydrogen compressors
series of metal hydride high pressure hydrogen compressors 903
Hydrogen diffusion
pulsed-field-gradient nuclear magnetic resonance studies of hydrogen diffusion in Laves-phase hydrides 220
^1H NMR study of local structure and proton dynamics in β-$Ti_{1-y}V_yH_x$ 226
neutron quasi-elastic scattering measurements of hydrogen diffusion in the $NiZr_2$ intermetallic phase 243
hydrogen diffusion studies of microcrystalline and crystalline $LaNi_{3.94}Si_{0.54}$ films 297
high temperature hydrogen diffusion in $Zr_{0.33}Ni_{0.67}$–H_X amorphous alloys 334
the study of hydrogen segregation on Zr(0001) and $Zr(10\bar{1}0)$ surfaces by static secondary ion mass spectroscopy, work function, Auger electron spectroscopy and nuclear reaction analysis 354
hydrogen uptake by oxidized zirconium alloys 716
Hydrogen dissolution
hydrogen dissolution into Yb-doped $SrCeO_3$ 713
Hydrogen electrode
the $TiV_3Ni_{0.56}$ hydride electrode: its electrochemical and cycle life characterization 616
Hydrogen excitation
the formation of excited H species using metal hydrides 856
Hydrogen-induced amorphization
hydrogen-induced structural changes of Fe_2Ce alloys 66
Hydrogen induced internal stresses
hydrogen solubility in $LaNi_5$ 448
Hydrogen-induced migration
a possible role for hydrogen-induced lattice migration in alloy materials processing 1
Hydrogen-induced segregation
hydrogen-induced segregation in Pd–Pt alloys 10
Hydrogen-induced suppression
hydrogen-induced suppression of phase transitions in Pd–rare earth alloys 15
Hydrogen in metals
muon spin relaxation in hydrogen loaded amorphous alloys 262
stress-induced reorientation of oxygen–hydrogen pairs in a $Ta_{75}Nb_{25}$ alloy 279
Hydrogen in niobium
quantum aspects of hydrogen motion in niobium at high temperatures 214
Hydrogen insertion
magnetic properties of the $R_2Fe_{17}H_x$ series 188
Hydrogen intermetallics
equilibria in the hydrogen–intermetallics systems with high dissociation pressure 498
Hydrogen interstitials
muon spin relaxation and hydrogen diffusion in the HfV_2 Laves phase 255
Hydrogen ion sources
the formation of excited H species using metal hydrides 856
Hydrogen loading
atomistic calculations of hydrogen loading in palladium 343
Hydrogen location
neutron diffraction study of YMn_2D_x deuterides ($1 \leq x \leq 3.4$) 99
Hydrogen masers
the formation of excited H species using metal hydrides 856
Hydrogen ordering
hydrogen ordering and metal–semiconductor transitions in superstoichiometric rare earth dihydrides 170

Hydrogen permeation
hydrogen permeation through PECVD (plasma-enhanced chemical vapor deposition) TiO_2 film on Pd by the time lag method 315
Hydrogen pressure
chemical equilibrium of the ferromagnetic $LaCo_5$–H system in strong magnetic fields 205
Hydrogen purification
hydrogen purification using fluorinated $LaNi_{4.7}Al_{0.3}$ alloy 860
Hydrogen segregation
the study of hydrogen segregation on Zr(0001) and $Zr(10\bar{1}0)$ surfaces by static secondary ion mass spectroscopy, work function, Auger electron spectroscopy and nuclear reaction analysis 354
Hydrogen site occupation
crystal structure of γ-phase $RCo_3H_{\sim 4}$ hydrides 104
Hydrogen solubility
hydrogen solubility in $LaNi_5$ 448
hydrogen solubility in zirconium alloys 503
hydrogen solubility in $PdLi_{0.94}$ and $Pd_2Li_{1.04}$ compounds 533
influence of interstitial oxygen on hydrogen solubility in vanadium 730
Hydrogen storage
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with $M = (Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
the effect of particle size and surface composition on the reaction rates of some hydrogen storage alloys 841
Hydrogen storage alloy
kinetics of hydrogen evolution reaction at nonstoichiometric hydrogen storage alloys for nickel-hydrogen batteries 558
electrochemical properties of the non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries 562
Hydrogen storage alloys
low cost AB_5-type hydrogen storage alloys for a nickel–metal hydride battery 635
Hydrogen storage application
hydriding characteristics in $(Ti,Zr)(Ni,Mn,X)_2$ alloys 524
Hydrogen storage electrodes
characteristics of the superstoichiometric C15-type Laves phase alloys and their hydride electrodes 582
second phase and electrode characteristics of rare-earth-based AB_{5+x} alloys 546
electrochemical impedance spectra study of the hydrogen storage electrode 625
Hydrogen supplier
characteristics of a hydrogen-absorbing alloy developed for a portable fuel cell 898
Hydroxidation
effects of oxidation and hydroxidation on the H_2 reactivities with Ni, Co, Ni–Co and $LaNi_{2.5}Co_{2.5}$ 684
Hysteresis
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
study of the pressure composition of the HfV_2–H_2 system 434
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 4: thermal history effects 460
thermodynamic particularities of some $CeNi_5$-based metal hydride systems with high dissociation pressure 479
Impurity effect
effects of carbon monoxide on the hydriding reactions of the untreated and fluorinated $LaNi_{4.7}Al_{0.3}$ alloys 829
Impurity trapping
trapping of positive muons in molybdenum 252
Incubation time
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
Initial activation
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound $(Ti, Zr)(Mn, Cr, Ni)_2$ 666
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Intercalation compounds
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Interdiffusion of hydrogen atoms
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Interface
hydrogen traps in the oxide–alloy interface region of Zr–Nb alloys 722
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Intermetallic
hydrogen-induced amorphization of intermetallics 20
effect of ball milling on hydrogen absorption properties of FeTi, Mg_2Ni and $LaNi_5$ 804
Intermetallic alloys
intrinsic behaviour analysis of substituted $LaNi_5$-type electrodes by means of in-situ neutron diffraction 537
Intermetallic compound
hydrogen-induced amorphization of titanium-based intermetallic compounds with the $D0_{19}$ structure 29
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Intermetallic compounds
neutron diffraction study of YMn_2D_x deuterides $(1 \leq x \leq 3.4)$ 99
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
hydrogen absorption properties of several intermetallic compounds of the Zr–Ni system 494
cyclic stability of various application-relevant metal hydrides 880
Intermetallic hydrides
thermodynamic particularities of some $CeNi_5$-based metal hydride systems with high dissociation pressure 479
Intermetallic hydrogen system
thermodynamic and degradation studies of $LaNi_{4.8}Sn_{0.2}$–H using isotherms and calorimetry 473
Intermetallic–hydrogen system
thermodynamic studies of the $LaNi_{5-x}Sn_x$–H system from $x =$ 0 to 0.5 467

Internal friction
correlations of phase relationships of metal–hydrogen systems with internal friction phenomena 287
hydrogen-induced internal friction in nanocrystalline palladium 337
Iodide titanium films
the influence of tungsten substrates on hydrogen absorption by iodide titanium films 798
Ion channeling
an ion channeling study of V_2D crystals 132
Ion-driven permeation
ion-driven permeation of hydrogen through surface-coated iron 291
Iron
ion-driven permeation of hydrogen through surface-coated iron 291
Iron substitutions
electrochemical and surface properties of iron-containing AB_5-type alloys 639
Irreversible decomposition
F-treatment effect on the initial activation characteristics of Mg–La–Ni amorphous alloys 696
Isotherms
hydrogen absorption properties of several intermetallic compounds of the Zr–Ni system 494
Isotope exchange
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824

Johnson–Mehl–Avrami-type equation
effect of surface contamination on the hydriding behaviors of $LaNi_{4.5}Al_{0.5}$, $LaNi_{2.5}Co_{2.5}$ and $LaNi_{4.5}Mn_{0.5}$ 403
Joule–Thomson effect
metal hydride compressor and its application in cryogenic technology 907

Kinetics
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
the hydriding and dehydriding kinetics of FeTi and $Fe_{0.9}TiMn_{0.1}$ 670
effect of KOH pretreatment on the hydriding properties of $LaNi_{2.5}Co_{2.5}$ alloy 679
the effect of particle size and surface composition on the reaction rates of some hydrogen storage alloys 841
Knight shift
measurement of the perturbation of the crystal electric field at Pr^{3+} in $PrNi_5$ next to a single hydrogen like interstitial 164
susceptibility and proton line shift of $Zr_{0.33}Ni_{0.67}$–H_X alloys 330

La-addition
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
$LaCo_5$
relationships between the electrical resistivity and the metal hydride phases 182
$LaCo_5H_x$
chemical equilibrium of the ferromagnetic $LaCo_5$–H system in strong magnetic fields 205
La-fluorinated surface
surface and metallographic microstructure of the La-added AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 392
$LaNi_5$
relationships between the electrical resistivity and the metal hydride phases 182
La–Ni–Mn tritides
aging effects in La–Ni–Mn tritides 792
$LaNi_{5-x}Sn_x$–H system
thermodynamic studies of the $LaNi_{5-x}Sn_x$–H system from x = 0 to 0.5 467
Lanthanide
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824
La substitution
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 666
Lattice parameters
structural and thermodynamic properties of the deuterium–palladium solid solutions systems: D_2-[Pd(Pt), Pd(Rh), Pd(Pt, Rh)] 440
Laves alloys
hydriding characteristics in (Ti,Zr)(Ni,Mn,X)$_2$ alloys 524
Laves compounds
muon spin relaxation in the C15 Laves compounds TaV_2 and TaV_2H_1 259
Laves phase
crystal structure of multiphase alloys (Zr,Ti)(Mn,V)$_2$ 85
study of the pressure composition of the HfV_2–H_2 system 434
substitution effect of elements in Zr-based alloys with Laves phase for nickel–hydride battery 587
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 666
Laves phase alloys
characteristics of the superstoichiometric C15-type Laves phase alloys and their hydride electrodes 582
Laves-phase hydrides
pulsed-field-gradient nuclear magnetic resonance studies of hydrogen diffusion in Laves-phase hydrides 220
Laves phase metal hydride
structural studies of a new Laves phase alloy (Hf,Ti)(Ni,V)$_2$ and its very stable hydride 90
Laves phases
the electrochemical properties of hydrogen storage Zr-based Laves phase alloys 578
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with M = $(Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
Liquid hydrogen
metal hydride compressor and its application in cryogenic technology 907
Liquid phase sintering
formation mechanism of MgH_2 at low temperatures in $Ti_{0.6}Zr_{0.4}Mn_{0.8}CrCu_{0.2}$–(Mg + Mg_2Cu) 689
Local structure
^{1}H NMR study of local structure and proton dynamics in β-$Ti_{1-y}V_yH_x$ 226
Long-range order
characterization of the structure of $TbD_{2.25}$ at 70 K by neutron powder diffraction 95

Long storability
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
Long term storability
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 666
Low temperatures
neutron powder diffraction study of deuterium ordering in β phase Pd–D at low temperatures 108

Magnesium
hydriding characteristics of Mg-based composites prepared using a ball mill 810
Magnesium alloy
a study of the surface composition and structure of fluorinated Mg-based alloys 397
Magnesium hydride
mechanical alloying of Mg–Ni compounds under hydrogen and inert atmosphere 815
cyclic stability of various application-relevant metal hydrides 880
Magnetic after-effect
hydrogen-induced structural changes of Fe_2Ce alloys 66
hydrogen diffusion in $DyFe_2$ and its effect on magnetic properties 71
Magnetic field effect
chemical equilibrium of the ferromagnetic $LaCo_5$–H system in strong magnetic fields 205
influences of magnetic fields on the electrochemical potential of $GdCo_5H_x$ electrodes 631
Magnetic properties
magnetic properties of the $R_2Fe_{17}H_x$ series 188
influence of hydrogen on the structural and magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R=rare earth) 195
magnetic properties of the hydrides based on R–Fe compounds 201
Magnetic resonance
measurement of the perturbation of the crystal electric field at Pr^{3+} in $PrNi_5$ next to a single hydrogen like interstitial 164
Magnetic susceptibility
hydrogen-induced structural changes of Fe_2Ce alloys 66
Magnetization
hydrogen-induced amorphization of intermetallics 20
Magnet materials
influence of hydrogen on the structural and magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R=rare earth) 195
Magnetoelastic effects
influence of hydrogen on the structural and magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R=rare earth) 195
Magnetoresistance
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Mass transfer
heat and mass transfer in coupled hydride reaction beds 871
Mean-field approximation
low temperature states in the β-CeH_{2+x} phase 115
Mechanical alloying
the relation between the discharge capacity and cycling number of mechanically alloyed Mg_xNi_{100-x} amorphous electrode alloys 621
Mechanical alloys
mechanical alloying of Mg–Ni compounds under hydrogen and inert atmosphere 815
Mechanical behaviour
the behaviour of hydrogen in Excel alloy 785
Mechanical grinding
the effects of mechanical grinding on the hydrogen storage properties of $MlNi_{4.7}Al_{0.3}$ alloy 820
Metal hydride
the electronic structure of the hydrogen solid solution in Ti_3P 153
chemical equilibrium of the ferromagnetic $LaCo_5$–H system in strong magnetic fields 205
surface properties of the fluorinated calcium-based AB_5 alloys 376
surface characteristics of fluorinated hydriding alloys 380
a study of the surface composition and structure of fluorinated Mg-based alloys 397
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 4: thermal history effects 460
consistent determination of the intrinsic kinetic properties between hydrogen and hydriding alloys 660
the hydriding and dehydriding kinetics of FeTi and $Fe_{0.9}TiMn_{0.1}$ 670
hydriding behavior of pseudobinary $CaAl_{2-x}M_x$ (M = B, Si, $0 \leq x \leq 1$) alloys 675
hydriding characteristics of Mg-based composites prepared using a ball mill 810
effects of carbon monoxide on the hydriding reactions of the untreated and fluorinated $LaNi_{4.7}Al_{0.3}$ alloys 829
effects of nickel coating on the properties of metal hydride electrodes 846
hydrogen purification using fluorinated $LaNi_{4.7}Al_{0.3}$ alloy 860
Metal hydride batteries
surface and bulk properties of the $Ti_yZr_{1-y}(V_xNi_{1-x})_2$ alloy system as active electrode material in alkaline electrolyte 645
Metal-hydride batteries
how to achieve long-term electrochemical cycling stability with hydride-forming electrode materials 604
Metal hydride bed
heat and mass transfer in coupled hydride reaction beds 871
Metal hydride electrode
improvement in cycle life performance of high capacity nickel–metal hydride battery 598
the relation between the discharge capacity and cycling number of mechanically alloyed Mg_xNi_{100-x} amorphous electrode alloys 621
influences of magnetic fields on the electrochemical potential of $GdCo_5H_x$ electrodes 631
Metal hydrides
formation of superabundant vacancies in metal hydrides at high temperatures 35
characterization of the structure of $TbD_{2.25}$ at 70 K by neutron powder diffraction 95

low-energy vibrations and octahedral site occupation in $Nb_{95}V_5H(D)_y$ 144
electronic structure of metal hydrides studied by high field magnetization 159
the effect of particle size and surface composition on the reaction rates of some hydrogen storage alloys 841
the formation of excited H species using metal hydrides 856
cyclic stability of various application-relevant metal hydrides 880
two-stage metal hydride heat transformer laboratory model 888
series of metal hydride high pressure hydrogen compressors 903
metal hydride compressor and its application in cryogenic technology 907
Metal-hydrides
influence of surface metal-hydride on the spin conversion of hydrogen molecules 364
Metal-hydride systems
neutron diffraction study on the short-range order in a $VD_{0.81}$ single crystal 126
Metal-hydrogen system
NMR spectral density functions for disordered metal–hydrogen systems 238
Metal–hydrogen system
magnetoresistance and Hall effect of sodium–hydride–Graphite ternary intercalation compounds 735
Metal–hydrogen systems
neutron scattering study of deuterium short-range order in VD_x 121
hydrogen-induced internal friction in nanocrystalline palladium 337
an apparatus for gravimetric analysis: its application to metal–hydrogen systems 422
Metallic conductivity
electronic structure of perovskite-derived hydrides 147
Metallic glass
proton nuclear magnetic resonance and H-site occupancy in $Zr_{0.5}Ni_{0.5-y}Cu_yH_x$ metallic glasses 325
susceptibility and proton line shift of $Zr_{0.33}Ni_{0.67}$–H_X alloys 330
Metallurgy
some applications of hydrogenation–decomposition–desorption– recombination (HDDR) and hydrogen–decrepitation (HD) in metals processing 51
Metal semiconductor transitions
hydrogen ordering and metal–semiconductor transitions in superstoichiometric rare earth dihydrides 170
Metastable phases
high-pressure studies of high-concentration phases of the Ti–H system 46
Metastable state
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
Mg_2Cu phase
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Mg_2Ni
mechanical alloying of Mg–Ni compounds under hydrogen and inert atmosphere 815
Mg–Ni mixture
mechanical alloying of Mg–Ni compounds under hydrogen and inert atmosphere 815
Microcrystalline films
hydrogen diffusion studies of microcrystalline and crystalline $LaNi_{3.94}Si_{0.54}$ films 297
Microencapsulation
the characteristics of the microencapsulated Ti–Ni alloys and their electrodes 852
Microstructure
some applications of hydrogenation–decomposition–desorption– recombination (HDDR) and hydrogen–decrepitation (HD) in metals processing 51
hydrogen diffusion in nanocrystalline, mesoscopic, and microcrystalline heterogeneous alloys 267
the $TiV_3Ni_{0.56}$ hydride electrode: its electrochemical and cycle life characterization 616
Mischmetal–Ni alloy
the effects of mechanical grinding on the hydrogen storage properties of $MlNi_{4.7}Al_{0.3}$ alloy 820
Ml
effect of Pr content in Ml on the electrochemical properties of $Ml(Ni–Co–Mn–Al)_5$ alloys 550
Ml–Ni alloys
effect of Pr content in Ml on the electrochemical properties of $Ml(Ni–Co–Mn–Al)_5$ alloys 550
Modification
the electrode characteristics and modified surface properties of $V_{0.9}Ti_{0.1}$ alloy sintered with Ni powder 650
Molecular dynamics simulation
quantum aspects of hydrogen motion in niobium at high temperatures 214
Molybdenum
trapping of positive muons in molybdenum 252
Monte Carlo method
atomistic calculations of hydrogen loading in palladium 343
Monte Carlo simulation
hydrogen diffusion in nanocrystalline, mesoscopic, and microcrystalline heterogeneous alloys 267
Morphology
the relation between microstructure and hydrogen absorbing property in Laves phase–solid solution multiphase alloys 508
Multilayer
analysis of hydrogen in Nb/Cu multilayers using ion beams 310
Multilayers
hydrogen-charging of Nb/Fe multilayers 307
Multiphase
crystal structure of multiphase alloys $(Zr,Ti)(Mn,V)_2$ 85
Multiphase alloy
the relation between microstructure and hydrogen absorbing property in Laves phase–solid solution multiphase alloys 508
Muon dynamics
dynamics of μ^+ in Sc and ScH_x 248
Muon location
dynamics of μ^+ in Sc and ScH_x 248
Muons
trapping of positive muons in molybdenum 252

Muon spin relaxation
muon spin relaxation and hydrogen diffusion in the HfV_2 Laves phase 255
muon spin relaxation in the C15 Laves compounds TaV_2 and TaV_2H_1 259
muon spin relaxation in hydrogen loaded amorphous alloys 262
Muon spin rotation
measurement of the perturbation of the crystal electric field at Pr^{3+} in $PrNi_5$ next to a single hydrogen like interstitial 164

Nanocrystalline materials
hydrogen-induced internal friction in nanocrystalline palladium 337
Nb/Cu
analysis of hydrogen in Nb/Cu multilayers using ion beams 310
Neutron diffraction
neutron diffraction study of YMn_2D_x deuterides ($1 \leq x \leq 3.4$) 99
crystal structure of γ-phase $RCo_3H_{\sim 4}$ hydrides 104
neutron scattering study of deuterium short-range order in VD_x 121
neutron diffraction study on the short-range order in a $VD_{0.81}$ single crystal 126
intrinsic behaviour analysis of substituted $LaNi_5$-type electrodes by means of in-situ neutron diffraction 537
hexagonal ZrNiAl alloy and its hydride (deuteride) with the Fe_2P-type structure 755
Neutron powder diffraction
characterization of the structure of $TbD_{2.25}$ at 70 K by neutron powder diffraction 95
neutron powder diffraction study of deuterium ordering in β phase Pd–D at low temperatures 108
Neutron quasi-elastic scattering
neutron quasi-elastic scattering measurements of hydrogen diffusion in the $NiZr_2$ intermetallic phase 243
Neutron scattering
low-energy vibrations and octahedral site occupation in $Nb_{95}V_5H(D)_y$ 144
Neutron scattering spectroscopy
neutron spectroscopic comparison of β-phase rare earth hydrides 138
Neutron vibrational spectroscopy
neutron spectroscopic comparison of β-phase rare earth hydrides 138
Nickel
agglomeration of hydrogen-induced vacancies in nickel 41
hydrogen absorption properties of several intermetallic compounds of the Zr–Ni system 494
the electrode characteristics and modified surface properties of $V_{0.9}Ti_{0.1}$ alloy sintered with Ni powder 650
thermodynamic characterization of new palladium alloy tritides 773
catalytic effects of lanthanides in hydrogen-absorbing lanthanide–Co or Ni compounds 824
Nickel coating
effects of nickel coating on the properties of metal hydride electrodes 846
Nickel–hydrogen battery
electrochemical properties of the non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries 562
Nickel–metal hydride battery
improvement in cycle life performance of high capacity nickel–metal hydride battery 598
low cost AB_5-type hydrogen storage alloys for a nickel–metal hydride battery 635
Niobium–hydrogen system
SIMS investigations on the system $NbH_n(D_n)$ ($0 < n < 1$) 347
Niobium oxides
photo-electrochemical properties of hydrogen in anodically oxidized niobium 702
Ni-rich layer
surface properties of the F-treated ZrTiVNi alloy 387
NMR spectra
proton nuclear magnetic resonance and H-site occupancy in $Zr_{0.5}Ni_{0.5-y}Cu_yH_x$ metallic glasses 325
NMR studies
pulsed-field-gradient nuclear magnetic resonance studies of hydrogen diffusion in Laves-phase hydrides 220
Nonstoichiometric composition
kinetics of hydrogen evolution reaction at nonstoichiometric hydrogen storage alloys for nickel-hydrogen batteries 558
Nonstoichiometry
electrochemical properties of the non-stoichiometric hydrogen storage alloys for nickel–hydrogen batteries 562
Non-stoichiometry
how to achieve long-term electrochemical cycling stability with hydride-forming electrode materials 604
NRA
analysis of hydrogen in Nb/Cu multilayers using ion beams 310
Nuclear magnetic relaxation
muon spin relaxation and hydrogen diffusion in the HfV_2 Laves phase 255
Nuclear magnetic resonance
nuclear magnetic resonance study of the phase transitions in TiH_2 and TiD_2 233
high temperature hydrogen diffusion in $Zr_{0.33}Ni_{0.67}$–H_X amorphous alloys 334
Nuclear materials
hydrogen uptake by oxidized zirconium alloys 716
Nuclear reaction analysis
hydrogen-charging of Nb/Fe multilayers 307
the study of hydrogen segregation on Zr(0001) and $Zr(10\bar{1}0)$ surfaces by static secondary ion mass spectroscopy, work function, Auger electron spectroscopy and nuclear reaction analysis 354
Nuclear spin relaxation
NMR spectral density functions for disordered metal–hydrogen systems 238
Nucleation and growth
the incipient kinetics of hydride growth on cerium surfaces 368
Nucleation site
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}$/Mg on MgH_2 formation as a result of hydrogen interdiffusion 766
Numerical simulation
heat and mass transfer in coupled hydride reaction beds 871

Octahedral site occupation
characterization of the structure of $TbD_{2.25}$ at 70 K by neutron powder diffraction 95
O–H(D) clusters
stress-induced reorientation of oxygen–hydrogen pairs in a $Ta_{75}Nb_{25}$ alloy 279
Ordered states
low temperature states in the β-CeH_{2+x} phase 115
Ordering transitions
low temperature states in the β-CeH_{2+x} phase 115
Oxidation
study of hydrogen storage in Mg_2Ni by thermal desorption spectrometry 483
effects of oxidation and hydroxidation on the H_2 reactivities with Ni, Co, Ni–Co and $LaNi_{2.5}Co_{2.5}$ 684
Oxide
hydrogen traps in the oxide–alloy interface region of Zr–Nb alloys 722
Oxygen
influence of interstitial oxygen on hydrogen solubility in vanadium 730

Palladium
correlations of phase relationships of metal–hydrogen systems with internal friction phenomena 287
atomistic calculations of hydrogen loading in palladium 343
Palladium alloy titrides
thermodynamic characterization of new palladium alloy tritides 773
Palladium hydrogenation
kinetics of H(D)–absorption in Pd cathodes 655
Partial molar enthalpy
substitution effect of elements in Zr-based alloys with Laves phase for nickel–hydride battery 587
Particle kinetics
heat and mass transfer in coupled hydride reaction beds 871
Particle size
the effect of particle size and surface composition on the reaction rates of some hydrogen storage alloys 841
Path integral simulation
quantum aspects of hydrogen motion in niobium at high temperatures 214
P–C isotherms
electrochemical pressure–composition isotherms for amorphous $Ni_{1-x}Zr_x$ alloys 321
the relation between microstructure and hydrogen absorbing property in Laves phase–solid solution multiphase alloys 508
P–C isotherms
structural and thermodynamic properties of the deuterium–palladium solid solutions systems: D_2-[Pd(Pt), Pd(Rh), Pd(Pt, Rh)] 440
P–C isotherms model
characteristics of a hydrogen-absorbing alloy developed for a portable fuel cell 898
P–C–T isotherms
F-treatment effect on the hydriding properties of the La-substituted AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 666
P–C–T property
hydriding characteristics in (Ti,Zr)(Ni,Mn,X)$_2$ alloys 524
P–C–T relation
second phase and electrode characteristics of rare-earth-based AB_{5+x} alloys 546
δ–ε Phase transition
influence of the preparation conditions of titanium hydride and deuteride $TiH_X(D_X)$ ($X \approx 2.00$) on the specific heat around the δ–ε transition 78
Pd–Pt–H system
hydrogen-induced segregation in Pd–Pt alloys 10
Pd–Pt–Rh ternary solid solutions
structural and thermodynamic properties of the deuterium–palladium solid solutions systems: D_2-[Pd(Pt), Pd(Rh), Pd(Pt, Rh)] 440
Pd–rare earth alloys
hydrogen-induced suppression of phase transitions in Pd–rare earth alloys 15
Pd/TiO_2 bilayer
hydrogen permeation through PECVD (plasma-enhanced chemical vapor deposition) TiO_2 film on Pd by the time lag method 315
Pellet
hydrogen purification with metal hydride sintered pellets using pressure swing adsorption method 865
Permeation
the science and application of modulated permeation experiments 302
Perovskites
electronic structure of perovskite-derived hydrides 147
Phase diagrams
low temperature states in the β-CeH_{2+x} phase 115
Phases
correlations of phase relationships of metal–hydrogen systems with internal friction phenomena 287
Phase transformations
intermetallic hydrides: (I) investigation of the rate of phase transformation 427
Phase transitions
hydrogen-induced suppression of phase transitions in Pd–rare earth alloys 15
nuclear magnetic resonance study of the phase transitions in TiH_2 and TiD_2 233
Photoelectrochemistry
photo-electrochemical properties of hydrogen in anodically oxidized niobium 702
Potassium
interaction of potassium–graphite intercalation compounds with hydrogen at pressures up to 2000 atm 740
Powder neutron diffraction
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with $M = (Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
Pr
effect of Pr content in Ml on the electrochemical properties of $Ml(Ni–Co–Mn–Al)_5$ alloys 550
Praesodymium alloys
measurement of the perturbation of the crystal electric field at Pr^{3+} in $PrNi_5$ next to a single hydrogen like interstitial 164
Preparation conditions
influence of the preparation conditions of titanium hydride and deuteride $TiH_X(D_X)$ ($X \approx 2.00$) on the specific heat around the δ–ε transition 78
Pressure
equilibria in the hydrogen–intermetallics systems with high dissociation pressure 498

Pressure–composition isotherms
study of the pressure composition of the HfV_2–H_2 system 434
hydrogen absorption properties of Ti–Cr–A (A ≡ V, Mo or other transition metal) B.C.C. solid solution alloys 528
Protective coating
surface and metallographic microstructure of the La-added AB_2 compound (Ti, Zr)(Mn, Cr, Ni)$_2$ 392
Proton conductor
proton conductors of oxide and their application to research into metal–hydrogen systems 706
PSA
hydrogen purification with metal hydride sintered pellets using pressure swing adsorption method 865
Pseudobinary $CaAl_{2-x}M_x$ (M = B, Si, $0 \leq x \leq 1$) alloys
hydriding behavior of pseudobinary $CaAl_{2-x}M_x$ (M = B, Si, $0 \leq x \leq 1$) alloys 675
Pulverization
hydrogen absorption properties of uranium alloys 780
Purification
hydrogen purification with metal hydride sintered pellets using pressure swing adsorption method 865
Pyrophoricity
hydrogen absorption properties of uranium alloys 780

Quantum aspects
quantum aspects of hydrogen motion in niobium at high temperatures 214

Rare earth dihydrides
hydrogen ordering and metal–semiconductor transitions in superstoichiometric rare earth dihydrides 170
Rare-earth hydride-forming compounds
how to achieve long-term electrochemical cycling stability with hydride-forming electrode materials 604
Rare earths
effect of rare earth composition on the electrochemical properties of multicomponent $RENi_{5-x}M_x$ (M = Co, Mn, Ti) alloys 553
Rate capacity
surface properties of the F-treated ZrTiVNi alloy 387
Rate controlling step
effect of surface contamination on the hydriding behaviors of $LaNi_{4.5}Al_{0.5}$, $LaNi_{2.5}Co_{2.5}$ and $LaNi_{4.5}Mn_{0.5}$ 403
Reaction kinetics
consistent determination of the intrinsic kinetic properties between hydrogen and hydriding alloys 660
Rechargeable electrode materials
how to achieve long-term electrochemical cycling stability with hydride-forming electrode materials 604
Recombination
microstructural evolutions during HDDR phenomena in $Sm_2Fe_{17}N_x$ compounds 60
Recovery of segregated alloy
hydrogen-induced segregation in Pd–Pt alloys 10
Resistivity
relationships between the electrical resistivity and the metal hydride phases 182
high temperature hydrogen diffusion in $Zr_{0.33}Ni_{0.67}$–H_X amorphous alloys 334
R_2Fe_{17} alloys
magnetic properties of the $R_2Fe_{17}H_x$ series 188
R–Fe compounds
magnetic properties of the hydrides based on R–Fe compounds 201
Rietveld analysis
the relation between microstructure and hydrogen absorbing property in Laves phase–solid solution multiphase alloys 508
Rietveld refinement
crystal structure of multiphase alloys (Zr,Ti)(Mn,V)$_2$ 85
structural studies of a new Laves phase alloy (Hf,Ti)(Ni,V)$_2$ and its very stable hydride 90
hexagonal ZrNiAl alloy and its hydride (deuteride) with the Fe_2P-type structure 755

Scattering mechanisms
electrical transport properties of $ZrFe_{2-x}Cr_xH_y$ 176
Secondary ion mass spectrometry
hydrogen uptake by oxidized zirconium alloys 716
Segregation/ordering
a possible role for hydrogen-induced lattice migration in alloy materials processing 1
Sensor
proton conductors of oxide and their application to research into metal–hydrogen systems 706
Short-range order
neutron scattering study of deuterium short-range order in VD_x 121
Short range ordering
neutron diffraction study on the short-range order in a $VD_{0.81}$ single crystal 126
Short-range order parameter
^{1}H NMR study of local structure and proton dynamics in β-$Ti_{1-y}V_yH_x$ 226
Sieverts' law
hydrogen solubility in $LaNi_5$ 448
SIMS
SIMS investigations on the system $NbH_n(D_n)$ ($0 < n < 1$) 347
Sintering
the electrode characteristics and modified surface properties of $V_{0.9}Ti_{0.1}$ alloy sintered with Ni powder 650
Sm_2Fe_{17} compound
microstructural evolutions during HDDR phenomena in $Sm_2Fe_{17}N_x$ compounds 60
Snoek–Köster relaxation
hydrogen-induced internal friction in nanocrystalline palladium 337
Solid echo
proton nuclear magnetic resonance and H-site occupancy in $Zr_{0.5}Ni_{0.5-y}Cu_yH_x$ metallic glasses 325
Solid electrolyte
proton conductors of oxide and their application to research into metal–hydrogen systems 706
Solid solution alloys
hydrogen absorption characteristics of Pd–Cr and Pd–Mo solid solution alloys 436
Solubility
hydrogen solubility limits in Excel, an experimental zirconium-based alloy 488
Specific heat
influence of the preparation conditions of titanium hydride and deuteride $TiH_X(D_X)$ ($X \approx 2.00$) on the specific heat around the δ–ε transition 78

Spin conversion
influence of surface metal-hydride on the spin conversion of hydrogen molecules 364
Spin-lattice relaxation time
^{1}H NMR study of local structure and proton dynamics in β-$Ti_{1-y}V_yH_x$ 226
Static-concentration-waves theory
low temperature states in the β-CeH_{2+x} phase 115
Static secondary ion spectroscopy
the study of hydrogen segregation on Zr(0001) and Zr(10$\bar{1}$0) surfaces by static secondary ion mass spectroscopy, work function, Auger electron spectroscopy and nuclear reaction analysis 354
Structural determination
neutron diffraction study of YMn_2D_x deuterides ($1 \leq x \leq 3.4$) 99
Substitution effect
substitution effect of elements in Zr-based alloys with Laves phase for nickel–hydride battery 587
Superabundant vacancies
formation of superabundant vacancies in metal hydrides at high temperatures 35
high-pressure studies of high-concentration phases of the Ti–H system 46
Superstoichiometry
hydrogen ordering and metal–semiconductor transitions in superstoichiometric rare earth dihydrides 170
Surface
the electrode characteristics and modified surface properties of $V_{0.9}Ti_{0.1}$ alloy sintered with Ni powder 650
Surface composition
effects of zirconium on the surface structures of the fluorinated hydrogen-absorbing alloys 417
Surface contamination
a method for improving the long-term storability of hydriding alloys by air/water exposure 411
Surface effect
study of hydrogen storage in Mg_2Ni by thermal desorption spectrometry 483
Surface hydrides
the incipient kinetics of hydride growth on cerium surfaces 368
Surface properties
electrochemical and surface properties of iron-containing AB_5-type alloys 639
Surface reaction
the science and application of modulated permeation experiments 302
Surface state
surface properties of the F-treated ZrTiVNi alloy 387
effects of La addition on the electrochemical behavior and F treatment of Zr–Ti–V–Ni alloys 565
Surface structure
surface properties of the fluorinated calcium-based AB_5 alloys 376
surface characteristics of fluorinated hydriding alloys 380
a study of the surface composition and structure of fluorinated Mg-based alloys 397
Surface treatment
surface properties of the fluorinated calcium-based AB_5 alloys 376
surface characteristics of fluorinated hydriding alloys 380
a study of the surface composition and structure of fluorinated Mg-based alloys 397
effects of carbon monoxide on the hydriding reactions of the untreated and fluorinated $LaNi_{4.7}Al_{0.3}$ alloys 829
hydrogen purification using fluorinated $LaNi_{4.7}Al_{0.3}$ alloy 860
Susceptibility
hydrogen diffusion in $DyFe_2$ and its effect on magnetic properties 71

Ta/Nb alloys
stress-induced reorientation of oxygen–hydrogen pairs in a $Ta_{75}Nb_{25}$ alloy 279
Terbium deuteride
characterization of the structure of $TbD_{2.25}$ at 70 K by neutron powder diffraction 95
Ternary additives
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Theory
Fermi energy effects on absorption of hydrogen in $LaNi_5$ and $LaCo_5$ alloys 454
Thermal desorption
hydrogen dissolution into Yb-doped $SrCeO_3$ 713
Thermal desorption spectrometry
study of hydrogen storage in Mg_2Ni by thermal desorption spectrometry 483
Thermal energy
two-stage metal hydride heat transformer laboratory model 888
Thermal history
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 4: thermal history effects 460
Thermal sorption
series of metal hydride high pressure hydrogen compressors 903
Thermodynamic characterization
thermodynamic characterization of new palladium alloy tritides 773
Thermodynamic properties
thermodynamic properties and the degradation of $ZrNiH_x$ at elevated temperatures 518
Thermodynamics
hydrogen-induced amorphization of intermetallics 20
hydrogen absorption characteristics of Pd–Cr and Pd–Mo solid solution alloys 436
structural and thermodynamic properties of the deuterium–palladium solid solutions systems: D_2-[Pd(Pt), Pd(Rh), Pd(Pt, Rh)] 440
thermodynamic studies of the $LaNi_{5-x}Sn_x$–H system from x = 0 to 0.5 467
thermodynamic and degradation studies of $LaNi_{4.8}Sn_{0.2}$–H using isotherms and calorimetry 473
hydrogen solubility in $PdLi_{0.94}$ and $Pd_2Li_{1.04}$ compounds 533
Ti- and Ca–MH systems
the characterization of Ti– and Ca–MH systems in the high temperature chemical heat pump for gas-cooled reactor applications 895
Ti–H system
high-pressure studies of high-concentration phases of the Ti–H system 46

Ti hydride/deuteride
influence of the preparation conditions of titanium hydride and deuteride $TiH_X(D_X)$ ($X \approx 2.00$) on the specific heat around the $\delta-\varepsilon$ transition 78
Time-lag
hydrogen permeation through PECVD (plasma-enhanced chemical vapor deposition) TiO_2 film on Pd by the time lag method 315
TiNi alloy
a mathematical model for the cycle life of hydride electrodes 611
Ti–Ni alloy
the characteristics of the microencapsulated Ti–Ni alloys and their electrodes 852
Titanium
surface and bulk properties of the $Ti_yZr_{1-y}(V_xNi_{1-x})_2$ alloy system as active electrode material in alkaline electrolyte 645
hydrogen absorption properties of uranium alloys 780
Ti–V–Fe alloy
H_2 Absorbing–desorbing characterization of the Ti–V–Fe alloy system 513
Transformation
hydrogen-induced amorphization of intermetallics 20
hydrogen-induced amorphization of titanium-based intermetallic compounds with the $D0_{19}$ structure 29
Transmission electron microscopy
microstructural evolutions during HDDR phenomena in $Sm_2Fe_{17}N_x$ compounds 60
the relation between microstructure and hydrogen absorbing property in Laves phase–solid solution multiphase alloys 508
Trapping
hopping and tunnelling of D trapped by substitutional Zr in Nb single crystals 274
Traps
hydrogen traps in the oxide–alloy interface region of Zr–Nb alloys 722
Tritium
aging effects in La–Ni–Mn tritides 792
Tungsten substrates
the influence of tungsten substrates on hydrogen absorption by iodide titanium films 798
Tunnelling
low-temperature quantum diffusion of light particles in solids 208
Tunnel states
hopping and tunnelling of D trapped by substitutional Zr in Nb single crystals 274

Uranium
hydrogen absorption properties of uranium alloys 780

Vacancy
agglomeration of hydrogen-induced vacancies in nickel 41
Vanadium
neutron diffraction study on the short-range order in a $VD_{0.81}$ single crystal 126
influence of interstitial oxygen on hydrogen solubility in vanadium 730
Vanadium based alloy
the $TiV_3Ni_{0.56}$ hydride electrode: its electrochemical and cycle life characterization 616
V_2D
an ion channeling study of V_2D crystals 132
Vibrational spectroscopy
low-energy vibrations and octahedral site occupation in $Nb_{95}V_5H(D)_y$ 144
Void
agglomeration of hydrogen-induced vacancies in nickel 41
Volmer–Tafel mechanism
kinetics of hydrogen evolution reaction at nonstoichiometric hydrogen storage alloys for nickel-hydrogen batteries 558

X-ray diffraction
structural studies of a new Laves phase alloy $(Hf,Ti)(Ni,V)_2$ and its very stable hydride 90
second phase and electrode characteristics of rare-earth-based AB_{5+x} alloys 546
hexagonal ZrNiAl alloy and its hydride (deuteride) with the Fe_2P-type structure 755

Ytterbium
hydrogen dissolution into Yb-doped $SrCeO_3$ 713

Zero-magnetic-field technique
muon spin relaxation in the C15 Laves compounds TaV_2 and TaV_2H_1 259
Zircaloy
hydrogen solubility in zirconium alloys 503
Zirconium
the study of hydrogen segregation on Zr(0001) and $Zr(10\bar{1}0)$ surfaces by static secondary ion mass spectroscopy, work function, Auger electron spectroscopy and nuclear reaction analysis 354
hydrogen solubility limits in Excel, an experimental zirconium-based alloy 488
hydrogen absorption properties of several intermetallic compounds of the Zr–Ni system 494
hydriding characteristics in $(Ti,Zr)(Ni,Mn,X)_2$ alloys 524
hydrogen solubility in zirconium alloys 503
surface and bulk properties of the $Ti_yZr_{1-y}(V_xNi_{1-x})_2$ alloy system as active electrode material in alkaline electrolyte 645
hydrogen traps in the oxide–alloy interface region of Zr–Nb alloys 722
hydrogen absorption properties of uranium alloys 780
Zirconium addition
effects of zirconium on the surface structures of the fluorinated hydrogen-absorbing alloys 417
Zirconium alloys
hydrogen solubility in zirconium alloys 503
hydrogen uptake by oxidized zirconium alloys 716
Zirconium–chromium alloys
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with $M = (Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
Zr-based hydrogen storage alloys
the electrochemical charge–discharge properties of Zr–Cr–Ni hydrogen storage alloys 573

$ZrCr_{1.8}Cu_{0.3}/Mg$
investigations of interfacial materials design—the effect of interface microstructures in $ZrCr_{1.8}Cu_{0.3}/Mg$ on MgH_2 formation as a result of hydrogen interdiffusion 766
$ZrNiH_x$
thermodynamic properties and the degradation of $ZrNiH_x$ at elevated temperatures 518
$Zr(Cr_{1-x}M_x)_2$
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with $M = (Cu_{0.5}Ni_{0.5})$ and $0 < x < 0.2$ and their hydrides 760
